

We would be very upset to lose what we have gotten in Indiana to keep those pain in the butt sales callers from calling us all night long. We had to get caller ID to screen all the calls out that we were getting every evening. After putting in long ten hour days we have no desire to be pestered in our personal home life. Life has become more pleasant in the evening without the phone ringing off the hook and then no one being there because you get a recording.
